

## Titanium Valves Engineered to Perform and Last for the Same Price as Factory Valves

Factory titanium valves don't live. When they died, you had three choices for replacement:

- Another set of low-mileage factory valves;
- Heavy, performance-robbing steel valves; or
- Very expensive aftermarket titanium valves.

Now, there's an alternative that makes sense and cents, Del West Moto titanium valves. With Del West Moto, you get:

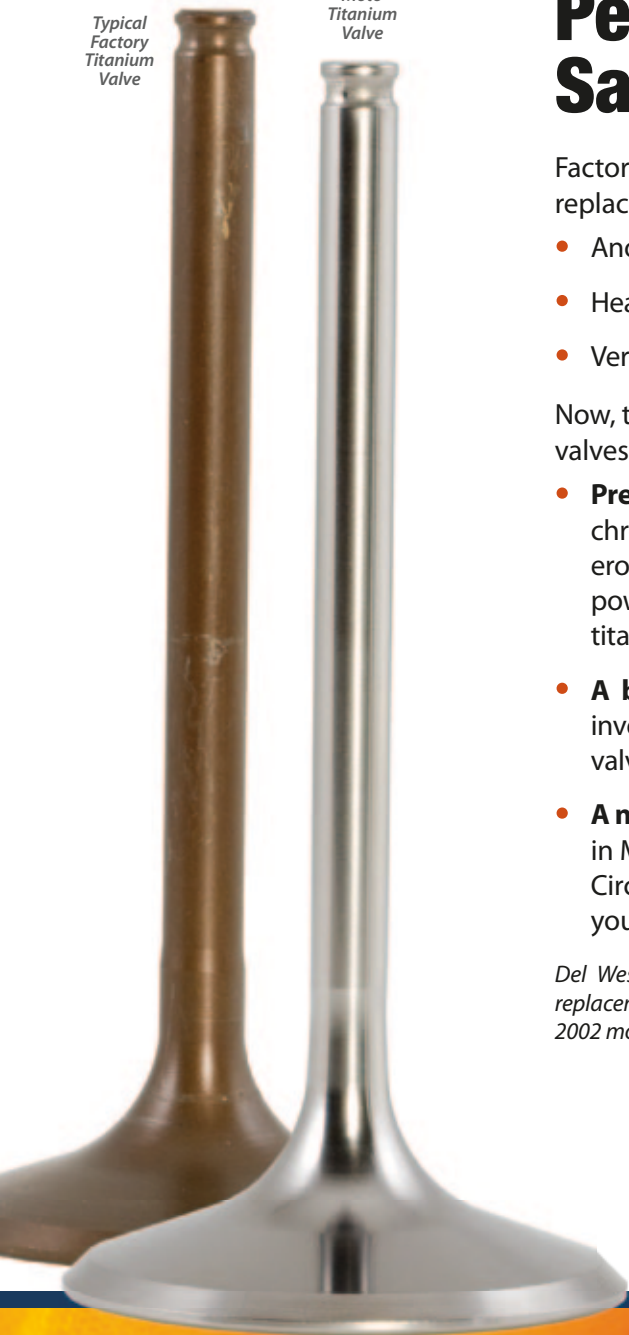

- **Precision-machined titanium valves that perform and live.** Our full chromium-nitride coating provides the ultimate protection against seat erosion, tip wear and seat and stem erosion. They deliver all the rpm and power designed into your engine, and deliver it for far longer than factory titanium valves
- **A better deal.** Del West Moto titanium valves benefit from a \$4 million investment in manufacturing equipment that cuts our cost, and yours. Our valves seriously out-perform factory valves for the same price.
- **A name and a product you can trust.** Del West pure racing valves dominate in MotoGP, Formula 1, NASCAR and, thanks to our long relationship with Pro Circuit, in Pro motocross and other series. You may not know our name, but you've seen us win.

*Del West Moto titanium valves. Available now from leading motorcycle dealers and shops for replacement in all popular Honda, Yamaha, Kawasaki and Suzuki motocross engines, beginning with 2002 models.*
